

EXECUTIVE MEMORANDUM: SIZING & STRATEGY FOR TRIAL ATTENDANCE

TO: Founder's Office & Finance, BrightCHAMPS	DATE: September 21, 2026
FROM: Bharanee B (AI Forward Deployed Associate)	TARGET: Pre-Demo Attendance Rate (+₹24.12L/mo)

GROSS LEAK CEILING ₹61.62 Lakhs/mo 584.5 No-Shows / month	RECOVERABLE CASH +₹24.12 Lakhs/mo +40.2 Net Conv/mo (68.9x ROI)	CONTROL BASELINE 63.80% Show Rate 1,614.5 scheduled demos/mo	TARGET THRESHOLD 78.00% Show Rate Internal 24–48h benchmark cohort
---	---	--	--

1. THE LEAK: THEORETICAL CEILING VS. RECOVERABLE CASH

Across 5,000 anonymised leads covering two operating months (June–July 2026; 2,500/mo) at ₹60,000 revenue per student and ₹900 CAC, the funnel's single largest revenue drain is **Demo Scheduled → Demo Joined (The Pre-Demo No-Show Drop)**. Out of 3,229 scheduled demos, 1,169 failed to attend (584.5 no-shows/mo; 36.20% no-show rate). With a 17.57% historical attendee-to-paid conversion rate (362/2,060), each attending parent has an expected value of ₹10,544. The theoretical maximum ceiling is ₹61,62,786/mo (~₹61.62 Lakhs/mo). Crucially, timestamp analysis uncovers a 24-hour scheduling lag cliff: leads scheduled within 24–48 hours already achieve an internal show rate of 77.52%, whereas leads delayed >48 hours collapse to 45.40%. Our 78.00% target is an internal empirical benchmark, recovering 229.3 attendees/month and eliminating 172 hours/mo of sales counselor downtime in empty Zoom rooms.

Funnel Stage	Monthly Vol	Stage Conv %	Funnel %	Financial Leak Working (INR / Month)
Lead → Demo Scheduled	1,614.5	64.58%	64.58%	885.5 unscheduled = ₹7.97L flushed CAC (₹38.47L lost rev)
Demo Scheduled → Joined	1,030.0	63.80%	41.20%	584.5 NO-SHOWS × 17.57% conv × ₹60k = ₹61.62L GROSS CEILING
Demo Joined → Completed	893.0	86.70%	35.72%	137.0 in-demo drops × 20.27% conv × ₹60k = ₹16.66L / month
Demo Completed → Converted	181.0	20.27%	7.24%	Baseline Rev: ₹1.086 Cr / mo (Contribution: ₹86.10L / mo)

2. THE LEVER: AI WHATSAPP ATTENDANCE CONCIERGE ('TOTTO') & TRADE-OFFS

- **Chosen Zero-Engineering Lever ('Totto'):** A 2-way conversational WhatsApp agent triggered instantly via CRM webhook upon booking (Wati/Aisensy + Make.com). Deployed in 14 days without an engineering sprint: (1) 1-Click Calendar Sync: Injects Google/Apple (.ics) holds + 30s personalized video teaser of the child's coding project. (2) Interactive T-24h & T-2h Confirmation: 1-tap WhatsApp buttons ('Confirm Spot' or 'Reschedule to Tomorrow') to capture schedule conflicts before counselor downtime. (3) T-10m Direct Launch: Pings parent with 1-tap direct Zoom join link and hardware checklist (laptop/audio). Sized Impact: Brings show rate from 63.8% to 78.0% (anchored to 77.5% benchmark), recovering 229.3 attendees/mo = +40.2 net conversions/mo = ₹24,12,000/mo incremental revenue (₹2.89 Cr/yr run-rate) against ₹35k/mo tooling cost (68.9x ROI).
- **Alternatives Considered & Rejected:** (1) Outbound AI Voice Bot: Rejected due to >60% parent hangups on robocalls and severe TCPA/DND regulatory compliance penalties in US/UK. (2) Timezone Routing Alone: Two-proportion z-tests prove only USA routing is statistically significant (z = 2.65, p = 0.008, unlocking ₹11.31L/mo); other cells are sample noise. Even on US_SHIFT, US no-show is 30.4%. Deployed as Day-1 operational prerequisite. (3) Post-Demo Pitch Copilot: Requires >6 weeks rep coaching, suffers subjective adoption, and ignores empty Zoom rooms.

3. BIGGEST ADOPTION RISK & OPERATIONAL MITIGATION

- **Core Risk (Workflow Bypass & Spam Fatigue):** Sales reps may distrust bot confirmations and double-call parents (causing annoyance), while parents may block spammy alerts.
- **Operational Mitigations:** (1) Zero Disruption SOP: Bot writes directly to CRM field attendance_status ('CONFIRMED', 'RESCHEDULE_PENDING'). Morning standup rule: 'Green means locked; do not dial.' Saves 172 hours/mo. (2) Value-First Engagement: Messages focus on the child's customized project preview rather than sales pressure. (3) Frictionless Opt-Out: Typing 'STOP' halts automation immediately, flagging CRM record DO_NOT_CONTACT.

4. PRE-REGISTERED BASELINE & MEASUREMENT FRAMEWORK

- **Control Baseline & A/B Setup:** Scheduled leads = 1,614.5/mo; Baseline Show Rate = 63.80%; Demo-to-Paid = 17.57%; Blended CAC = ₹900. Measured via 14-day 50/50 randomized A/B test split by Lead ID modulo across all geographies.
- **Target Threshold & Guardrails:** Primary Success: Variant Show Rate reaches ≥ 78.00% (anchored to 77.52% internal benchmark; p < 0.01). Guardrail: Opt-out rate < 2.5%; Demo completion rate ≥ 86.0%.
- **Finance Sign-Off Formula:** ΔRevenue = N_scheduled × (ShowRate_Variant - ShowRate_Control) × 17.57% × ₹60,000 (Weekly reconciliation with FP&A and Sales Ops).
