

EXECUTIVE MEMORANDUM

TO: Founder's Office & VP Finance, BrightCHAMPS
FROM: Candidate (AI Forward Deployed Associate) • DATE: September 21, 2026
SUBJECT: 14-Day Operational Strategy to Recover Pre-Demo No-Shows

Dataset: 5,000 Leads (2 Mo)
Unit Price: ₹60,000
Blended CAC: ₹900

GROSS LEAK (TAM) ₹61.62 Lakhs 584.5 No-Shows / mo (100% cap)	RECOVERABLE IMPACT ₹24.12 Lakhs/mo ₹2.89 Cr / year run-rate	PRE-REGISTERED BASELINE 63.80% Show Rate 1,614.5 scheduled demos/mo	TARGET (EMPIRICAL) 78.00% Show Rate +40.2 Net Paid Conversions/mo
--	---	---	---

1. THE LEAK: THEORETICAL CEILING VS. REALISTIC RECOVERABLE LOSS

Across 5,000 leads (June–July 2026; 2,500/mo), the single largest revenue drain is the **Pre-Demo No-Show Drop-Off (Scheduled → Joined)**. Out of 3,229 scheduled demos, 1,169 parents failed to attend (**584.5 no-shows/month; 36.20% no-show rate**).

FUNNEL STAGE	MONTHLY VOL	STAGE %	FUNNEL %	FINANCIAL SIZING & IMPACT WORKING
Lead → Demo Scheduled	1,614.5	64.58%	64.58%	885.5 unscheduled/mo = ₹7.97L flushed CAC (₹38.47L lost rev at 7.24% conv)
Demo Scheduled → Joined	1,030.0	63.80%	41.20%	584.5 NO-SHOWS × 17.57% conv × ₹60,000 = ₹61,62,786 / MO THEORETICAL CEILING
Demo Joined → Completed	893.0	86.70%	35.72%	137.0 in-demo drop-offs × 20.27% conv × ₹60,000 = ₹16.66L / month
Demo Completed → Converted	181.0	20.27%	7.24%	Baseline revenue: ₹1,08,60,000 / month (Net contribution: ₹86.10L / mo)

Root Cause & Empirical Grounding: Rigorous sizing separates the theoretical ceiling (₹61.62L/mo if 100% of no-shows attended) from recoverable revenue. In the dataset, leads scheduled within 24–48h **already achieve a 77.52% show rate**; leads delayed >48h collapse to **45.4%**. In EdTech, parental excitement decays rapidly without calendar sync. Our 78.0% target is an **internal empirical benchmark**, recovering 229.3 attendees/month and eliminating 172 hours/mo of counselor downtime in empty Zoom rooms.

2. THE LEVER: AI WHATSAPP ATTENDANCE CONCIERGE ("AARAV") & TRADE-OFFS

The Chosen Lever: A 2-way conversational WhatsApp agent triggered via CRM webhook on demo booking (via Wati/Aisensy + Make.com). Deployed in 14 days with zero engineering sprints:

- 1-Click Calendar Hold:** Injects Google/Apple Calendar links (.ics) with reminder alerts + 30s project teaser.
- Interactive T-24h & T-2h Confirmation:** 1-tap buttons ("Confirm Spot" or "Reschedule to Tomorrow").
- T-10m Direct Launch:** Pings parents with 1-tap Zoom link and 60-second hardware checklist (laptop/audio).
- Recoverable Financial Impact:** Slashes no-show rate from **36.2% to 22.0%** (anchored to the 77.5% benchmark). At historical 17.57% demo-to-paid conversion, yields **+40.2 net conversions/mo = ₹24,12,000/mo incremental revenue (₹2.89 Cr/year)** against ₹35k/mo tooling cost (**68.9x ROI**).

Rejected Alternatives: (1) *Outbound Voice Calling Bot*: High friction; >60% parents hang up; severe TCPA/DND compliance penalties across US/UK. (2) *Timezone Routing Alone*: Two-proportion z-tests prove only the USA effect is statistically significant (z = 2.65, p = 0.008, unlocking ₹11.31L/mo); other cells are sample noise. Even on US_SHIFT, US no-show is 30.4%. We deploy USA routing as a Day-1 operational rule, but focus the primary build on attendance. (3) *Post-Demo Pitch Copilot*: Requires >6 weeks rep coaching, subjective adoption, and ignores empty demo rooms.

3. BIGGEST ADOPTION RISK & OPERATIONAL MITIGATION

Core Risk: Rep Workflow Bypass & Parent Spam Fatigue. Counselors might mistrust bot statuses and continue double-calling parents, causing confusion, while parents might block automated WhatsApp alerts.

- Zero Rep Disruption:** Bot writes directly to CRM field attendance_status (CONFIRMED, RESCHEDULE_PENDING). Rep morning SOP: "Green means locked; do not dial." Counselors save 172 hours/month.
- Value-First Content:** Messages feature the child's customized coding project preview, not generic reminders.
- Instant Opt-Out:** Replying "STOP" triggers immediate unsubscribing and tags CRM DO_NOT_CONTACT.

4. MEASUREMENT FRAMEWORK & PRE-REGISTERED BASELINE

- Pre-Registered Baseline:** Scheduled = 1,614.5/mo • Show Rate = **63.80%** • Join-to-Paid = **17.57%** • CAC = ₹900.
- Measurement Methodology:** 14-day 50/50 randomized A/B test on all scheduled demos (split by Lead ID modulo).
- Primary Metric:** Demo Show Rate in Variant reaches **≥ 78.00%** (anchored to 24–48h benchmark of 77.52%; p < 0.01).
- Guardrail Metrics:** Parent WhatsApp opt-out rate < 2.5%; Demo completion rate post-join holds at **≥ 86.0%**.
- Finance Verification Formula:** ΔRevenue = N_sched × (ShowRate_Variant – ShowRate_Control) × 17.57% × ₹60,000. Verified weekly by FP&A.
